

SUSTAINABLE, COST EFFECTIVE CLEANING SOLUTIONS

Effective cleaning products
for catering, encapsulated
in **water-soluble sachets**
which, when added to
water, create the perfect
sustainable cleaning
solution.

DID YOU KNOW?
MOST CLEANING CHEMICALS ARE 90% WATER...

95%

Reduction in CO2 Emissions

By removing the need to transport water, we significantly reduce the emissions associated with the distribution and storage of chemicals.

90%

Reduction in plastic waste

Our planet friendly packaging is made from compostable materials and our bottles are extremely durable so they can be used time and time again.

75%

Reduction in cost

Significant cost-in-use savings when compared to ready-made chemicals and the added benefit of dose-control when compared to other super-concentrated liquid solutions.

OUR SUSTAINABILITY JOURNEY

Established in 1995, EntirePro was launched with a vision to provide cleaning chemicals of a **premium quality at an affordable price**.

Now with over **25 years experience** supporting the needs of both independent and national accounts, our product range has grown to encompass **100+ different formulas** for multiple applications throughout the hotel, restaurant & catering industry.

As we move into a new era of sustainability, we're committed to **minimising the environmental impact** our industry has on the planet. By switching to pod-based solutions, we firmly believe we can become a **driving force for good**, revolutionising the way the industry approaches janitorial supplies, helping to make the world a better place for future generations to enjoy.

- Our tried and tested active formulas, now contained within **PVOH film sachets** that are dry, compact and light.
- A truly **zero plastic waste** product with all packaging made from biodegradable and compostable materials.
- Relevant products tested to **EN1276** and **EN14476** standards, as well as article 95 biocidal regulations.
- Biodegradable formulas conforming to REACH sustainable standards and manufactured at ISO:9001 & ISO14001 facilities.
- A fully supported professional product** with QR code linked safety data sheets, online training and task-based cleaning plans.

GOODBYE SINGLE USE PLASTIC!

By switching to a pod system, you can eliminate single use plastics from your supply chain. Simply add 1 sachet to a re-usable bottle or bucket to create the perfect ready-to-use cleaning solution.

Example amount of plastic a leading hospitality company has saved in 1 year by switching to a pod system and re-usable bottles:

259,220

Triggers/1 Litre bottles

+

25,871

5 Litre containers

=

20.6 Tonnes Total Plastic Saved

*Assuming a trigger/bottle weight of 65.5g and a 5 litre container weight of 140g.

HELLO REDUCED CO2 EMISSIONS!

Our online **sustainability calculator** will show you what impact switching to Pod Pro would have on the carbon footprint of your business.

TRIGGER SPRAYS

- 1 Fill the bottle with water to the fill line (500ml).
- 2 Add PodPro sachet to the trigger spray bottle.
- 3 Replace trigger head and shake the bottle until fully dissolved.
- 4 Spray onto surface and apply as necessary. Wipe with clean cloth or allow to dry.

X1 The concentration of water in the sachet is designed to make it safe to be sprayed over skin. This is not intended for use on surfaces or clothing. Only use on skin with dry hands. If a sachet is being applied to a surface with the correct PPE (avoid contact with skin). PodPro sachets are designed for professional use only. Always wear full PPE before use.

A **fully supported** solution, with safety & training info linked from the QR code on each bottle.

Plus **personalised cleaning plans** developed to suit your business*

*Available on request, based on annual spend.

WHAT'S NEXT FOR POD PRO ?

We are always looking to extend our extensive range of commercial chemicals.
